

Dear Marian Home Care Services,
Following my surgery and hospital stay, I came home to be with my family. We started home care visits immediately. My greatest need those first few days was nursing. I didn't even realize how much I needed information regarding my sutures and medications. I had a fair degree of pain and the nurse explained everything fully and with clarity to both me and my family. She explained why I had certain symptoms and what to expect about medications. They were always on time, kind and professional and did a wonderful job. They helped me in ways I hadn't even thought of.
